Company History

PROVIDING SPECIALIST SECURITY SOLUTIONS SINCE 1989

ViS was established in 1989. Originally named Video Information Systems Limited, we were established to provide specialist security solutions within Northern Ireland. As the company grew in size, it was restructured and was renamed ViS Security Solutions Limited and moved to its current Head Office location off Belfast's Lisburn Road.

Specialising in Intruder, CCTV and Access Control systems the company was awarded NSI Gold accreditation in all three disciplines and soon afterwards was awarded ISO Quality Management 9001, 14001 and 18001, and were one of the first security companies in Ireland to secure such accreditations and recognitions.

Due to the ever increasing demand and success of the company, we established our commercial department and further expanded our solutions offerings to include Automated Fire Protection, Building Management Systems and Structured Cabling. Soon afterwards the company were awarded NSI Gold and SP203 in Fire Alarm Installation and Design Services.

As the company expanded, so did our pedigree and recognition with leading security manufacturers and as a result we became Irelands only ever Panasonic Premier Integrator, we also achieved accreditations from companies such as Hirsch, Inner Range, Delta Controls and Excel.

In 2004, the company first embraced IP which at the time was an Emerging Technology within the security industry. We realised however that this was the future of the security industry and established a dedicated IP Department who are responsible for the design and development of network based security solutions. Today we are the market leaders in Collaborative IP Solution Designs and Installations and have 3 locations in Ireland. We are PSA Licensed and are a Cisco Advanced Technology Partner for Physical Security Solutions.

Accreditations

INTEGRITY, EXCELLENCE, STABILITY

As a company ViS Security Solutions pride ourselves in achieving only the highest standards within the security industry.

The following Standards have been achieved by the company and are implemented when providing the design, installation and commissioning including maintenance of all integrated security installations. The company installations and processes are regularly inspected by the Private Security Authority, the National Security Inspectorate and ISO Quality Management Assessors. Our accreditations include:

NSI Gold for Intrusion Detection Systems, CCTV, Access Control and Fire Detection Systems, **PSA Licensed** for Intrusion Detection Systems and **SP203** in Fire Detection Systems.

ISO 9001: 2000 Intrusion Detection, CCTV, Access Control, Fire Detection, Voice, Public Address, Data and Building Management Systems.

ISO 14001: 2004 Intrusion Detection, CCTV, Access Control, Fire Detection, Voice, Public Address, Data and Building Management Systems.

ISO 18001: 2007 Intrusion Detection, CCTV, Access Control, Fire Detection, Voice, Public Address, Data and Building Management Systems.

We are also **Constructionline Certificated** and our member of the **Safe Contractor Scheme** and **British Safety Council**.

Products & Services

MULTI DISCIPLINED, SCALABLE, COLLABORATIVE SOLUTIONS.

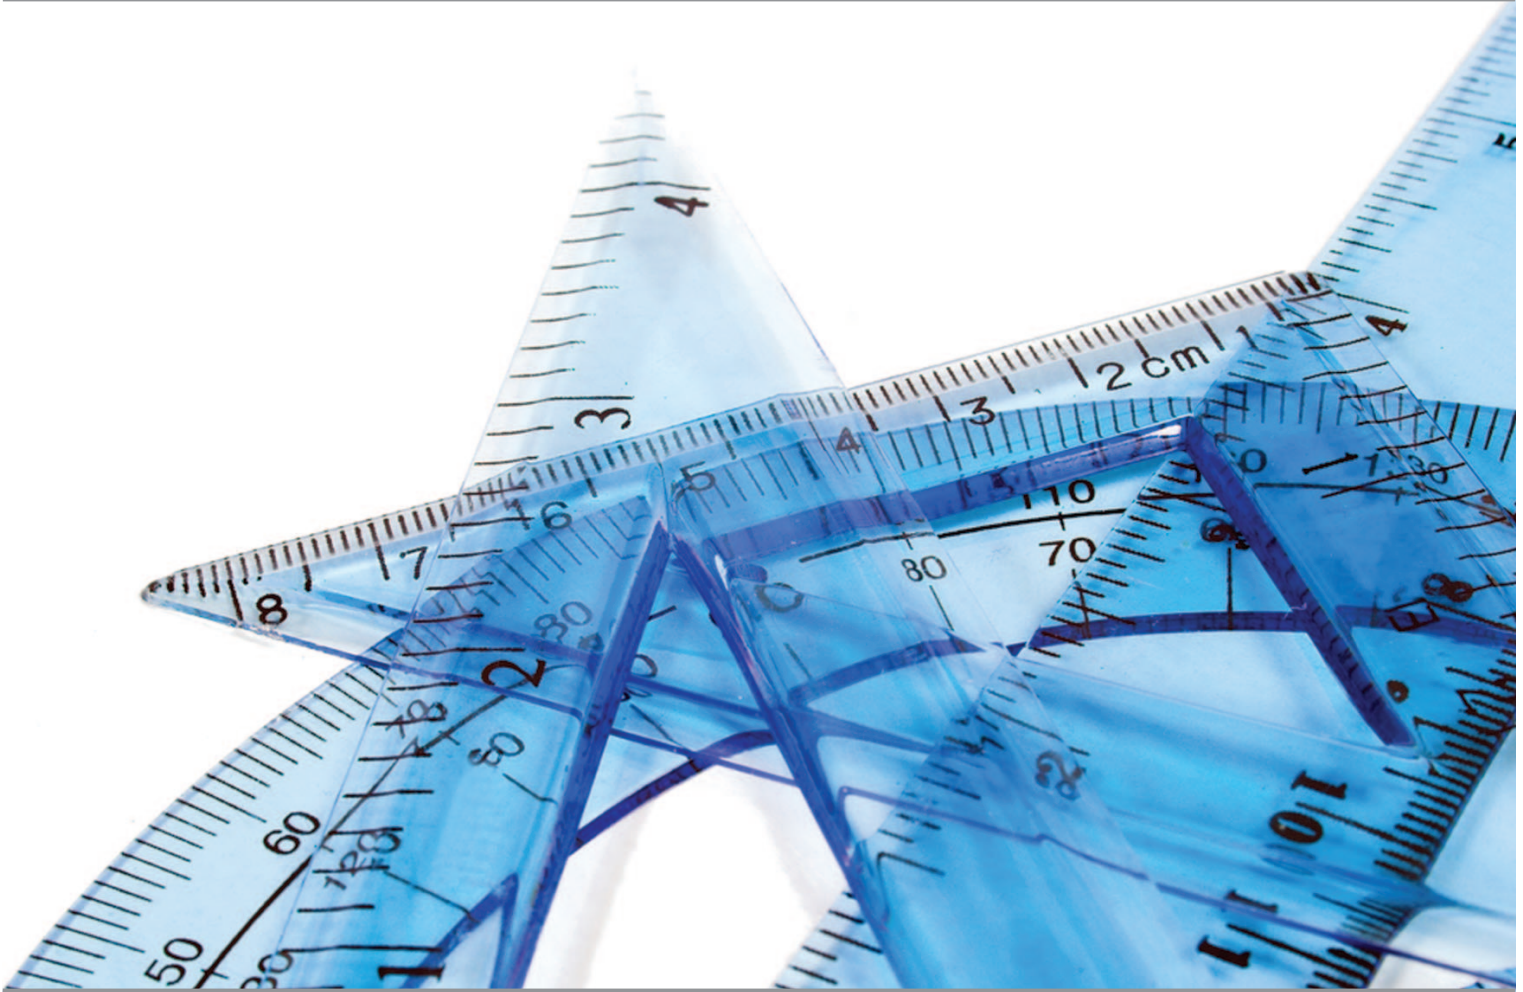

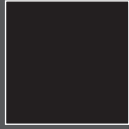

ViS Security Solutions are Ireland's leading multiple disciplined security solutions provider. Over the years we have specialised in various security industry disciplines which enables us to offer an "end to end" solution for all our clients. In specialising in these disciplines, we have achieved multiple certifications, accreditations and awards from manufacturers and are regularly inspected by governing and regulatory bodies.

In achieving these accreditations and manufacturers recognitions, we have committed our team of highly qualified engineers to specific training directly from the manufacturer, giving you the peace of mind that the design, installation and maintenance on the systems are being conducted in line with the manufacturers guidelines and warranty schemes.

Our product portfolio includes the specialist design, installation, commissioning, project management and maintenance of the following disciplines:

Intrusion and Perimeter Detection, Video Surveillance (CCTV), Access Control, Fire Detection, Voice, Public Address, Data Nurse and Warden Call Systems and Building Management Systems. We also specialise in Physical Security Information Management or PSIM applications and to this end, we are an accredited Proximex Systems Integrator.

All our products and services are covered by our comprehensive maintenance and support packages which can be tailored to suit your individual company requirements.

Design Services

TECHNICAL ANALYSIS AND RISK ASSESSMENT PROGRAM.

ViS Security Solutions offer a Technical Analysis and Risk Assessment Program or (TAP). The Technical Analysis and Risk Assessment Program is designed to provide a full review of your organisations physical security applications, processes and procedures that manage your day to day security requirements. Offered as a Professional Service, the scheme is fully insured and provides a cost effective alternative to expensive security consultancy fees. To further assist in reducing costs and delivering an unrivalled Professional Service, a rebate program has been developed with the ViS TAP initiative that ensures that any costs shall be offset should you decide to use the ViS products and services as part of the Stage 4 process.

As part of the TAP process we will provide a full documented report of our findings which will include the following:

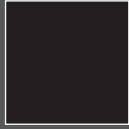

Stage No.1: Current State, Technology and Business.

Stage No.2: Potential State, Collaboration.

Stage No.3: GAP Analysis Assessment between Stages 1 & 2.

Stage No.4: Recommend, Transform and Plan.

Full training, support manuals, system schematics and on line support will be offered as part of the process.

Client Projects

SPECIALIST SOLUTIONS TO GOVERNMENTAL AND COMMERCIAL SECTORS.

Since our formation in 1989, ViS have become one of the market leaders in Ireland for the provision of collaborative, integrated security solutions for Central and Local Government and also for some of Ireland's leading commercial and blue chip companies.

The company offers integrated security solutions to the following sectors:

Governmental, Healthcare, Corporate, Education, Hospitality and Retail.

Most of the projects that we have been involved in include the provision of specialist design services, through to installation, commissioning and preventative maintenance on the systems which is controlled and managed by our dedicated on call staff and 24 hour service department.

The main focus for the company is to provide innovation when designing solutions for our clients. Some of the larger installations that we have been involved in include the seamless integration of multiple sub-systems including intrusion and perimeter protection systems, fire detection, building management, access control, voice and video surveillance systems which are viewed, controlled and managed using a collaborative software application. By using this unique approach to security collaboration, we can provide our clients with a flexible open architecture system that will provide a return on investment, reduce the total cost of ownership and at the same time, increasing your security effectiveness.
