## **Proximex Adds International Partnerships in Ireland and Mexico**

*ViS Solutions and ConNext Join Growing List of Worldwide Proximex Integrators*

**Sunnyvale, CA (Business Wire) – August 25, 2010** – Proximex, the leader in event and information management for both physical and logical security markets, announced today it has signed more international system integrator partnerships. The new partnership agreements are with ViS Security Solutions Ltd. in Ireland and ConNext by Migesa in Mexico.

The Proximex partnerships with ViS Security Solutions and ConNext point to a continued interest in offering Proximex solutions globally. ViS Security Solutions of Ireland ([www.vis-security.com](http://www.vis-security.com)) specializes in offering multi-disciplined, scalable and integrated security solutions to government departments as well as commercial and blue chip companies. The company is a Cisco Advanced Technology Partner (ATP).

“As a result of our in-depth study of security management software applications, we firmly believe that Proximex provides superior capabilities and flexibility for collecting and collating information from disparate sub-systems,” said Stephen Moody, security development manager for ViS Security Solutions Limited. “The integration abilities of Surveillint align with our company strategy of offering our clients a technology migration to both deploy new technologies and maintain current systems, thus reducing operational and future costs. This partnership will assure our clients that we have a clear commitment of long-term support from Proximex.”

ConNext (<http://www.connexmtx.com>) is part of the Migesa Group. Created in 1981, Migesa employs 320 professionals in the U.S. and Mexico. Physical security solutions are professionally implemented by

ConNext by Migesa, a Cisco Certified Gold Partner. Cisco recently awarded ConNext the “Service Delivery Partner of the Year.”

“Partnering with Proximex allows us to offer a complete physical security portfolio with an emphasis in unified security operations centers to break the barrier of silo systems and improve security operations within our customers’ environments,” said Jorge Vasquez, director of physical security for ConNext.

“With most of the economic climate around the world mirroring the U.S. situation, global companies are seeking security solutions that will help reduce costs both in terms of ownership and return on investment,” said Charlie Sherlock, director of EMEA operations for Proximex. “Our agreements with ViS Security Solutions and ConNext by Migesa demonstrate that companies are ready to commit to using Proximex Surveillint in order to create a more secure environment and save capital expenditure.”

### **About Proximex**

Proximex is the leader in event and information management for both physical and logical security markets. Transportation, defense and corporate customers applaud Proximex solutions for delivering the fastest set up and deployment, the highest in scalability, availability and failover capabilities, and the most robust integrations in the industry. The company’s flagship product, Proximex Surveillint, is an enterprise-class solution that joins and correlates information from disparate security systems into one centralized environment, thereby, transforming massive amounts of data into useable, actionable information. Surveillint leverages the company’s IT heritage by integrating physical and logical security systems with network and health monitoring technologies to catch multi-pronged attacks and relay important business-level information. Proximex C100, the industry’s first centralized command and control center appliance, provides small- to mid-sized companies with best-in-class PSIM functionality at an affordable price and with an easy-to-install design. Privately held, Proximex is headquartered in Sunnyvale, California with offices in Colorado, Connecticut, Tennessee, Texas and the United Kingdom. For more information about Proximex, visit <http://www.proximex.com>.
